1. Applicant's election of Group I in the reply filed on 3/11/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 32-39 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/11/2005.
3. Claims 1-31, 40-43 are under consideration.
4. This application contains claims directed to the following patentably distinct species of the claimed invention.
  - a) The antibody of claim 3 or claim 5. These antibodies are chemically distinct and have different functional properties.
  - b) The antibody of claim 7 or a V/L two chain antibody. These antibodies are chemically distinct and have different functional properties.
  - c) The antibody of claim 8 wherein one of the constant regions is selected. If applicant elects gamma, then applicant is required to pick one of the isotypes of claim 10. These antibodies are chemically distinct and have different functional properties.
  - d) An antibody with one of the specificities recited in claim 13/15/17/41 (that is a single antibody from said claims such as antiCD3, etc). These antibodies recognize different molecules that are structurally and functionally distinct.
  - e) If applicant elects antiCD3, then applicant needs to elect the species of claim 26 or one of the mutants recited in claim 42. These antibodies are chemically distinct and have different functional properties.
5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
